ART UNIT

PAPER NUMBER

1619

DATE MAILED: 12/31/2001

*LL*

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	Application No.	Applicant(s)	
	09/351,149	THORPE ET AL.	
	Examiner	Art Unit	
	Shahnam Sharareh	1619	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Peri d f r R ply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 24 September 2001.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-30 and 43-49 is/are pending in the application.
- 4a) Of the above claim(s) 10-15, 20-23 and 44 is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-9, 16-19, 24-32, 43 and 45-49 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on \_\_\_\_\_ is: a) ☐ approved b) ☐ disapproved by the Examiner.  
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

**Pri rity under 35 U.S.C. §§ 119 and 120**

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
a) ☐ All b) ☐ Some \* c) ☐ None of:  
1. ☐ Certified copies of the priority documents have been received.  
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.  
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).  
\* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).  
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

### **DETAILED ACTION**

1. Amendment filed on September 28, 2001, Paper No. 14 has been entered. Claims 1-30, 43-49 are pending.
2. Claims 10-15, 20-23, 44 are withdrawn from further consideration, as being drawn to a nonelected species. Applicant timely traversed the restriction (election) requirement in Paper No. 15.
3. This application contains claimed 10-15, 20-23, 44 drawn to an invention nonelected with traverse in Paper No. 14. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP. 821.01.

### ***Response to Amendment***

4. Applicant's argument with respect to the rejection of claims under 35 USC 112 second paragraph have been fully considered and are found partially persuasive. Accordingly, any rejection that is not addressed in this Office Action is considered withdrawn.
5. The Declaration filed on September 24, 2001 under 37 CFR 1.131 is sufficient to overcome the WO 98/29453 reference. Accordingly, the rejections of claims under 35 U.S.C. 103(a) have been obviated.

Any rejection that is not addressed in this Office Action is considered obviated in view of the Arguments.

### ***Claim Rejections - 35 USC § 112***

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9, 16-19, 24-32, 43, 45-48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

7. The recitation of "at least a second anti-cancer agent" in the claims is ambiguous. Applicant's arguments with respect to this rejection have been fully considered but they are not persuasive.

8. Applicant argues that the recitation must be interpreted in light of the specification and that in light of the present disclosure, it is clearly understood that "first" anti-cancer agent is "the first antibody, or an antigen binding fragment thereof, that binds to an aminophospholipid." Applicant further contends that there are incredibly detailed teachings concerning the use of naked anti-aminophospholipid antibody as the first anti-cancer agent.

9. In response, Examiner states that first of all the instant claims are not directed to "naked anti-aminophospholipid antibodies", nor are they reciting the term "the first anti-cancer agents" as described in specification at page 32, lines 1-9. Rather the claims are directed to a first antibody, or an antigen binding fragment thereof, and a detectably labeled antibody, or antigen-binding fragment thereof that binds to an aminophospholipid or at least a second anti-cancer agent. Therefore, there is no indication as to what encompasses the first anti-cancer agent?

10. Second, even in light of the specification at page 32, line 1-9, the claims are ambiguous. The specification at page 32, line 6-7 of the states "The at least a first cancer agent' may thus be considered to be 'at least a second anti-cancer agent'." This definition does not clarify the ambiguities of the rejected claims. Accordingly, even in view of the specification the metes and bounds of the claim are not clear.

***Claim Rejections - 35 USC § 102***

11. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

12. Claims 1, 3-5, 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Fishman (IDS, 2/14/2000).

The instant claims are directed to a kit comprising a biologically effective amount of first antibody that binds to an aminophospholipid, and an anticancer agent.

13. Fishman discloses anti-phospholipid antibodies directed to melanoma cells and other the cancer cells having over expressed outer membrane phosphatidylserine (abstract). Fishman discloses purifying IgG anti-PS antibodies from patients with antiphospholipid syndrome and examining their *in vivo* efficacy against melanoma tumor cells ELISA tests (see page 903, 1<sup>st</sup> col, 2<sup>nd</sup> paragraph).

14. As argued in Applicant's Response filed on September 28, 2001 and further in view of the definition of 'at least the second anti-cancer agent' at page 32, line 1-9, it appears that the second anti-cancer agent can be the same as the first anti-cancer agent. Moreover, the first anti-cancer agent encompass anti-aminophospholipid antibodies (see instant specification page 32, lines 1-9), thus, it is Examiner's position that Fishman's separate doses of anti-PS antibodies meets the limitations of the instant claims because they are directed to two separate anti-cancer agents. Furthermore, Fishman teaches the potential use of autoantibodies in diagnostic and therapeutic area such as treatment of squamous cell carcinoma of the skin (abstract, page 903, 2<sup>nd</sup> col, 2<sup>nd</sup> paragraph). Accordingly, Fishman's teachings anticipate the limitations of the instant claims.

15. Claims 1, 2-9, 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Schroit US Patent 6,300,308.

Schroit discloses methods for inhibiting cancer cell growth or killing cancer cells comprising eliciting a lipid specific antibody response with an immuologically effective amount of composition comprising a phosphatidylserine/polypeptide conjugate (abstract; col 13, lines 44-49; col 32, lines 50-60). Schroit further discloses kits comprising a lipid or lipid-carrier conjugate antigen-specific antibodies with suitable immunodetecting reagents such as detectable labels linked to a protein, peptide or antibody directed to aminophospholipid receptors in suitable pharmaceutical formulations (col 6, lines 65-68; col 7, lines 13-35; example; col 23, lines 29-65). Furthermore, Schroit sets forth that his PS-specific antibodies can be used in for prevention and treatment of conditions such as cancer wherein surfaces of the cells causing the condition are characterized by the presence of PS on their external leaflet (col 16, lines 38-44; col 19, lines 36-67).

16. Schroit also discloses therapeutic kits comprising one or more lipid-conjugate antigens or antibodies directed to phosphatidylserine receptors in separate containers (col 7, lines 40-67; col 8, lines 1-40; col 28, lines 1-67); subsequently, the kits of Schroit contain at least two anticancer agents. Moreover, Schroit teaches combination of his antibodies with a secondary anti cancer agents such as diphtheria toxoid (col 8, lines 65-67). Finally, Schroit discloses the use of humanized antibodies or recombinant antibodies in preparing his compositions (col 4, lines 33-49; col 13, lines 25-55). Furthermore, the priority date of Schroit is earlier than the effective filing date of the instant application. Accordingly, Schroit is a competent prior art and anticipates the limitations of the instant claims.

***Claim Rejections - 35 USC 103***

17. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

18. Claims 1-9, 16-19, 24-31, 43, 45-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schroit US Patent 6,300,308 in view of Gimbrone US Patent 5,632,991, Blackenberg et al US Patent 6,197,278, and Umeda (IDS, 9/19/1999).

The teachings of Schroit are discussed above. Schroit teaches that various known techniques may be used to prepare more specific antibodies. Further, Schroit elaborates that various types of antibodies such as humanized mAbs, or murine modified antibodies may be used for his methods (see col 4, lines 38-49;

col 13, lines 24-55). Schroit, however, fails to specifically disclose the use of other suitable antiphospholipid antibodies in combination with a second anticancer agent conjugated with a targeting antibody.

19. Gimbrone discloses targeting agents conjugated to an antibody directed to ELAM-1 (E-Selectin), (col 5, lines 18-38). Gimbrone teaches that such endothelial specific adhesion molecules are rapidly unregulated on the surface of cultured human vascular endothelial cells (col 27, lines 59-67). Gimbrone also discloses the use of his targeting agent-therapeutic agent conjugate, alone or in combination with other antibody or antibody fragment and/or a therapeutic agent (a second anti-cancer agent) (col 15, lines 46-55). Therapeutic agents of Gimbrone produce apoptosis as they encompass various toxins, antioxidants and anti-tumor drugs (see col 12-14, claim 2). Finally Gimbrone teaches that E-Selectin or a leukocyte-binding fragment thereof can be coupled to a chemotherapeutic drug that binds to tumor cell expressing receptors for E-Selectin, to kill the tumor cell (col 13, lines 58-67). Gimbrone also disclose methods for detecting E-Selectin expression within the body of a patient comprising steps of detecting E-Selectin by labeling the E-Selectin antibody with a radioactive isotope that can be detected under a scintillation counter (col 18, lines 60-65). Gimbrone does not teach the combination therapy of his antibody-therapeutic agent conjugate with an anti-aminophospholipids antibody.

20. Blackenberg teaches targeted radiolabeled anaxein V ( abstract, col 9, lines 50-55, col 12, lines 33-61, col 20, lines 41-55). Blackenberg does not teach the use of a therapeutic agent

21. The teachings of Schroit, Gimbrone Umeda, and Blackenberg are in the same field of endeavor as they are all directed to the field of antibody immunology.

It is *prima facie* obvious to combine two compositions each of which is taught by prior art to be useful for same purpose in order to form third composition that is to be used for very same purpose; idea of combining them flows logically from their having been individually taught in prior art. In *re Kerkhoven*, 205 USPQ 1069(CCPA) 1980.

22. Accordingly, it would have been obvious to one of ordinary skill in the art at the time of invention to combine the antiphospholipid antibodies of Schroit with conjugates of Gimbrone and Blackenburg in the same or distinct compositions, because the idea of combining them flows logically from their having been individually taught in prior art. Therefore, the claims that require no more than mixing together two conventional anti-tumor agents set forth *prima facie* obvious subject matter.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-9, 16-19, 24-32, 43, 45-49 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over pending claim of copending Application No. 09/351862. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are both directed to kits comprising antibodies directed to aminophospholipids.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### ***Conclusion***

30. Claim 32 appears to be free of art. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shahnam Sharareh, PharmD whose telephone number is (703) 306-5400. The examiner can normally be reached on Monday to Friday from 8:30 a.m. to 5:00 p.m. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diana Dudash can be reached on 703-308-2328. The fax phone number for this Group is 703-308-4556. Any inquiry of a general nature of relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is 703-308-1235.
